Catalog and Price-List of

BRICKS

1904-5

Kansas City Hydraulic-Press Brick Co.
KANSAS CITY, MO.

Office and Exhibit Rooms: Postal Telegraph Building.
PRICE-LIST.

We will be glad to quote delivered prices in car lots on any kind of brick we manufacture or handle; or will quote prices on less than car lots f. o. b. depot, Kansas City.

Samples will be cheerfully furnished at any time, free of cost.

Hydraulic-Press Brick are the best. Don’t fail to get our prices before you engage your brick.

Selected Bricks for Fireplaces and Similar Work.

Standard or Roman size, any color (except enameled, glazed or coated), $5.00 per 100,
Molded shapes, double list prices.
For grinding to arches, add 10 cents for each brick or piece of brick ground; cartage extra.

TERMS.

Payment in Kansas City current funds. We make sight draft with bill of lading unless otherwise arranged. Parties unknown to us must furnish satisfactory references or send cash with order.

COLORS.

Bricks in colors other than red are not assorted to shade as closely as is customary with red brick. This variety adds to the beauty of a building, and is usually desired by architects.
WE MAKE

ENAMELED BRICKS—of various colors, English, Roman, and Standard sizes.

GLAZED BRICKS—English, Roman, and Standard, sizes.

BRICKS WITH IMPERVIOUS WHITE OR GRAY FACE—Dead finish, non-absorbent, kept clean by action of the elements.

ORNAMENTAL SHAPES OF BRICKS—Over three hundred and fifty correct moldings.

FRONT BRICKS, FOR FACING WALLS—in Standard or Roman sizes, all colors.

WE GRIND BRICKS FOR ARCHES—Semi-circular, Segment, Elliptical, Gothic, or Flat.

COMMON BRICKS—for buildings, sidewalks, and sewers.

FIRE BRICK AND FIRE TILE—

FIRE CLAY—

MANTELS—We issue a separate catalog showing designs of Mantels of different sizes, suitable for various purposes, and will gladly mail same upon receipt of request to do so.

WE SELL

TERRA COTTA—Agents for Winkle Terra Cotta Co., St. Louis.

WALL COPING—Pacific white sand.

FLUE LINING—Vitrified brick.

MORTAR COLOR—Agents for the celebrated Sterling mortar colors, in red, brown, buff, and black.
INDEX.

Bricks suitable for—

*These quoins are made with either square or round corners.*
ENAMELED BRICKS OF SUPERIOR QUALITY.

White, Buff, Brown, Blue, and Green.

Approximate size.

English size, square corners......................... 9 x 3 x 4 1/2
English size, round corners.......................... 9 x 3 x 4 1/2
Roman size, square corners........................... 11 1/2 x 1 1/2 x 4
Roman size, round corners........................... 11 1/2 x 1 1/2 x 4
American size, square corners........................ 8 1/2 x 2 1/4 x 4
American size, round corners........................ 8 1/2 x 2 1/4 x 4
American Soap, square corners........................ 8 1/2 x 2 1/4 x 4

Any of the above sizes can be enameled on any one or two or three of the surfaces, as may be desired; prices depending upon requirements.

GLAZED BRICKS.

A transparent glaze on the surface of our buff, pink, or gray bricks, produces beautiful effects and renders the glazed surface impervious to moisture, affording a brick especially desirable from the standpoint of cleanliness and hygiene. Sizes, shapes, and prices, same as enameled bricks.

DEAD FINISH.

Impervious White or Gray Face.

For exterior walls, where it is desirable to avoid the glare of reflected light, and to secure a soft tone of white or gray, these bricks produce handsomer and more pleasing effects than enameled bricks. The vitrified white or gray face is impervious to water, and the only effect produced upon it by rain is to wash it clean.

We make these bricks in Standard and in Roman sizes.
**PRICE-LIST ENAMELED BRICKS, F. O. B. CARS KANSAS CITY.**

(For dimensions of Enamed Surface, see page 5.)

Prices per 1,000 are on basis of car-load shipments. Prices per 100 are on all less-than-car-load shipments, and include packing and cartage from our works to railroad station.

Prices subject to change without notice.

Write for prices on molded shapes, enamed, or for anything not covered by the above list. State color, shape, and quantity wanted. Prices transparent glazed same as white enamed.
Prices subject to change without notice.

ARCHES.

When ordering arches, please consult the following pages and give all necessary information as to details; when anything more than a simple semi-circle, segment, flat or Gothic arch is wanted, we should be furnished with full-size detail of half the arch, especially if cut stone or terra cotta is used in connection with the brick work.

Furnish details as far as possible in advance of time the arches will be required. With all necessary bricks in stock, we can usually grind arches within two weeks from receipt of order. If molded shapes are not in stock, and must be made before they are ground for the arches, we should be allowed eight weeks after receipt of the order.

Prices for Arches Containing no Molded Shapes.

<table>

</tbody>
</table>

For molded shapes ground to arches, add the list price of the shape to above prices for each molded shape required.

Above prices include packing and are f. o. b. our works.

(See pages 9 to 14.)
SEMICIRCLE ARCH.

Can be Made with Molded Reveal.

Give Following Details:

Width of opening.

Radius.

Depth of reveal or soffit.

Height of face.

If on piers, give width of pier.

Size of joints.

We provide for $\frac{3}{8}$-inch joints unless otherwise specified.
SEGMENT ARCH.

Can be Made with Molded Reveal.

Give Following Details:

Width of opening. Height of face.
Radius. Size of joints.
Depth of reveal or soffit. If on piers, give width of pier.

We provide for $\frac{3}{16}$-inch joints unless otherwise specified.
ELLIPtic ARCH.

Can be Made with Molded Reveal.

Give Following Details:

Width of opening.
Each of the three radii.
Rise or spring of arch.
Depth of reveal or soffit.
Height of face.
Size of joints.
If on piers, give width of pier.
We provide for $\frac{3}{16}$-inch joints unless otherwise specified.
GOTHIC ARCH.

Can be Made with Molded Reveal.

Give Following Details:

Width of opening.

Rise or spring of arch.

Radius.

Depth of reveal or soffit.

Height of face.

Size of joints.

If on piers, give width of pier.

We provide for $\frac{3}{16}$-inch joints unless otherwise specified.
FLAT ARCH.

This Arch we can not make with Molded Reveal.

Give Following Details:

Width of opening.
Radius.
Depth of reveal.
Height of face.
Size of joints.
If on piers, give width of pier.
We provide for $\frac{3}{16}$-inch joints unless otherwise specified.
SEGMENT ARCH, WITH FLAT TOP.

Can be Made with Molded Reveal.

Give Following Details:

Height of face. Size of joints.

We provide for \( \frac{3}{16} \)-inch joints unless otherwise specified.
MITRES.

External returns for string-courses, and internal angles for panels, are carried in stock in those shapes most used. When returns or panel mitres of shapes wanted are not in stock we mitre two bricks as shown below.

ALWAYS, WITHOUT FAIL,

State whether for return in string-course, around pilaster, or for panel mitre. Specify whether external or internal angle. We show each of above in following cuts. Refer to number of cut when ordering.

No. 1.
External angle, string-course.

No. 2.
Internal angle, string-course.

No. 3.
External panel mitre.

No. 4.
Internal panel mitre.
MOLDED SHAPES.

Are Standard Sizes Unless Otherwise Specified in Catalog,

and are made to match shade of straight bricks as nearly as possible, but a slight variation in color is often unavoidable.

State exact number required, as we can not estimate quantities from drawings or blue prints.

When ordering, state quantity of each—headers, stretchers, and returns,—and specify what kind of return—whether external or internal angle in string-course, or external or internal panel mitre (see page 15).

We have special molds for over three hundred shapes, but do not carry in stock all shapes in all colors. To insure satisfactory delivery in any color, they should be ordered six weeks in advance of requirements.

IMPORTANT.

NOTE.—We make molded shapes to increase the sale of our straight bricks, and are, therefore, compelled to decline to furnish molded shapes except to jobs using our straight bricks.

The following prices are net, F. O. B. cars, our works.

For lots requiring packing or drayage an extra charge will be made.

TERMS.—Payment in Kansas City current funds. We make sight draft with bill of lading unless otherwise arranged.
Prices subject to change without notice.

Bricks ordered by mistake or in excess of requirements can not be returned.

KANSAS CITY HYDRAULIC-PRESS BRICK COMPANY.

The advantages of this brick are as follows:

1st. By its use contractors are saved the loss of time and labor and the waste resulting from the custom of clipping press brick for binding corners in the old style.

2d. It makes a much stronger wall.
No. 204.—Bay Window, Angle $45^\circ$.
No. 259.—Bay Window, Angle $30^\circ$.

Projection, $4\frac{3}{8}$ in.
Starter is made for 210.

No. 211.

No. 211, in connection with No. 233, can be used to turn any angle for bay windows or for buildings built on lots of irregular shape. Radius, 2 in. and $1\frac{1}{2}$ in.
No. 212, with plain square brick, can be used to turn any angle for bay windows or for buildings built on lots of irregular shape. Projection, $4\frac{1}{4}$ inches.

Roman Size, Angle $45^\circ$.

Panel, 50 inches long.

To lengthen panel insert (after block A) Blocks B and C. The panel can not be increased less than 20 inches, as it requires two blocks (B and C) in every case.
STERLING MORTAR COLORS.

We carry a large stock, which enables us to make prompt shipments.
Prices on application.
For lots less than full barrels, an extra charge will be made for packing.

Directions for Mixing Mortar Colors.

First mix the color with the dry sand, then add the cold-slaked lime, and again mix thoroughly. It is very important that the color be uniformly mixed. If it is not added at first, but left until the mortar is made, the labor of mixing is doubled. The more thorough the mixture, the less color is required, and the cheaper it is for the consumer.

Directions for Using Mortar Colors.

Red, Brown and Buff.

For laying 1,000 bricks with spread joints, use about 70 pounds of color to two and one-half bushels of lime and one-half yard of sand. For buttered joints use 65 pounds of color.

Black.

For laying 1,000 brick with spread joints, use 50 pounds of black color to two and one-half bushels of lime and one-half yard of sand. For buttered joints use 40 pounds of color.

For Mottled Work.

Mix each color in a separate portion of the mortar or plaster, then produce the mottled effect by combining the different colored mortars.

Sections with pipe-holes, 50 per cent per foot additional.
SALT-GLAZED TERRA COTTA WALL-COPING.

This coping is made with lap-joints, has a drip on both sides of the wall, and can be more easily and cheaply set than any other kind in use. For each size of the wall the following designations of coping tiles are made, and the number of each should be stated in all orders.

2-foot lengths.  
18-inch lengths.  
Solid right angles.  
Branches of solid T's.

12-inch lengths.  
6-inch lengths.  
Angles of 45 degrees.  
Starters, with one end closed.

ORNAMENTAL TERRA COTTA.—We are agents for the Winkle Terra Cotta Company, of St. Louis, and are prepared to furnish estimates on ornamental terra cotta in any color.

FIRE-BRICK AND CLAY.—We make our fire-brick from a superior grade of fire-clay, in either our Standard- or Roman-press brick size. The smooth, neat surface of this brick permits close joints—an important matter in fire-brick work.

We have the ground fire-clay in 200-lb. sacks.
Where the cornice returns around the corner of a building, the length of each side must be taken on the line of greatest projection from face of building.

Returns for corners will be charged extra.
Prices given are for cornices in red brick.
Other colors 50 per cent additional.
